Art Unit: 2634

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2 rejected under 35 U.S.C. 102(e) as being anticipated by Birru.

Claim 1, Birru discloses a frequency domain equalizer that includes an orthogonal frequency division multiplexing decoder (OFDM) ([0003], lines 1-5). In this frequency domain equalizer Birru discloses an adaptive inverse channel estimator (fig 3, entirety, fig 2, 212). The equalizer taps in this device are referred to as frequency bins (abstract). Equations 7 and 8 are the update equations for the frequency bins dependent on λ and μ , respectively ([0042], [0043]). The values of λ and μ control the adaptive algorithm ([0048])

Claim 2, inherits the limitations of Claim 1, Birru discloses that the calculation of the tap coefficients includes the estimation of the error in which the mean squared error is minimized ([0039)]

Art Unit: 2634

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 3, 4 rejected under 35 U.S.C. 103(a) as being unpatentable over Birru.

Claim 3, inherits the limitations of Claim 2. Orthogonal Frequency Division Multiplexing (OFDM) is a commonly used in wireless transmissions because of its ability to avoid inter-carrier interference. The further limitation of receiving the OFDM signal over a wireless local area network is one obvious to one skilled in the art at the time of invention.

Claim 4, inherits the limitations of Claim 2. The use of OFDM is discussed in Claim 3. Desktop or portable computers are both common devices to receive signals in a wireless local area network. Therefore the further limitation of receiving the OFDM signal into at least one of a portable computer and a desktop computer is one obvious to one skilled in the art at the time of invention.

Art Unit: 2634

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 9 is rejected under 35 U.S.C. 112 2nd paragraph as indefinite.

Claim 9, recites the limitation "generating the channel estimate based on a product of the received training symbol the inverse". This limitation is unclear in meaning and is rendered vague and indefinite.

Claim Objections

- 6. Claims 5-8, 10-20 are allowable in view of the known prior art.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erin M. File whose telephone number is (571)272-6040. The examiner can normally be reached on M-F 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Chin can be reached on (571)272-3056. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
